Curated and presented by Andrés Cuartas / La Tostradora - Artes sonoras - visuales / Colombia

A curatorial project of video art and video performance composed by works of Colombian and Latin American artists. The program exposes different views in relation to the concept of landscape from an expanded perspective, which is approached from various studies on the body, the political being, the sound-visual experimentation, the everyday, the absurd, among other aesthetic manifestations, offering us other approaches of what the landscape represents, as a way of transmitting an idea using audiovisual language.

Program 2 - Colombian & Latin American artists

Luis Saray / Colombia
